

# How to get the list the number of a request via API?

URL: [http://www.nomedoseusite.com.br/api\\_orders.php?oID=ORDERNUMBER&action=orders\\_id](http://www.nomedoseusite.com.br/api_orders.php?oID=ORDERNUMBER&action=orders_id)

Parameter	Format	Description
oID	GET	Number of the Order ID Only number is required Format: bigint(11) * FIELD REQUIRED

## PHP Sample

```
// sample list orders id

$add_query_order = '';
$oID = '12302006081624';
if ($oID != '') {
    $add_query_order .= '&oID='.$oID;
}

$url = $domain_url . '/api_orders.php?action=orders_id'.$add_query_order;

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_SSL_VERIFYPEER, false);

curl_setopt($ch, CURLOPT_HTTPHEADER, array(
    'Content-Type: application/json',
    'Cache-Control: no-cache',
    'Usuariol: ' . base64_encode($usuariol),
    'Senha1: ' . base64_encode($senha1)
));

$result = curl_exec($ch);
curl_close($ch);

print_r($result);

// sample list orders id eof
```

Return Error:
