

How to get the list of registered Customer Groups via API?

URL: http://www.nomedoseusite.com.br/api_customers.php?action=customers_groups

PHP Sample:

```
// sample customers groups list

$url = $domain_url . '/api_customers.php?action=customers_groups';

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_SSL_VERIFYPEER, false);

curl_setopt($ch, CURLOPT_HTTPHEADER, array(

    'Content-Type: application/json',
    "Cache-Control: no-cache",
    'Usuariol: ' . base64_encode($usuariol),
    'Senha1: ' . base64_encode($senha1))

);

$result = curl_exec($ch);
curl_close($ch);

print_r($result);

// sample customers groups list eof
```

Return:

id
text
