How to add the email marketing server's email in your site's Cpanel email authentication?

By performing this process below the email marketing campaigns sent through MFORMULA MAIL will not be moved to the SPAM folder of the users who requested to receive your email marketing.

01) Access your cPanel

02) After login click on E-mail Authentication

03) IN SPF >> List Included (INCLUDED): >> Click the Add button

04) Add to your list mformulamail.com domain
