

# SSL / TLS Manager

SSL / TLS Manager will allow you to generate SSL certificates, signing requests, and keys. All of this is part of using SSL to make your site secure. SSL allows you to make pages secure on your site, so information such as logins, credit card numbers, and so on. Encrypted instead of conventional text. It is important to secure the login areas of your site, purchase areas and other pages where reserved information can spread over the Internet.
