

How to edit customer data groups?

01. Click on the server menu> Customers> Clients groups

02. Select the Edit button on the right.

03. Enter the changes.

04. And then select the refresh button.

Tip: When creating a registration link for the client group, if you enter in the url according to the example the group will be automatically selected when they click on the link.

Example: http://www.yoursite.com/create_account.php?cgroup=NameofGroupExtly
