

How to add / edit / delete an E-mail Template?

01) Access the Control Panel

02) Click Tools >> Email Template

03) To register click Add Email Template

04) To edit click on the line of Email Template

05) To edit click on the line of Email Template >> After check the DELETE box and click the SAVE button

NOTE: Subsetting parameters by data may not work with sending multiple e-mails in requests.
