### PHP Sample:

```
// sample customers list

$add_query_order = '';
$search = '';
if ($search != '') {
    $add_query_order .= '&search='.$search;
}
$date_from = '';
if ($date_from != '') {
    $add_query_order .= '&date_from='.$date_from;
}
$date_to = '';
if ($date_to != '') {
    $add_query_order .= '&date_to='.$date_to;
}
$status = '';
if ($status != '') {
    $add_query_order .= '&status='.$status;
}
$customers_groups_id = '';
```

# Customers

```
if ($customers_groups_id != '') {
    $add_query_order .= '&customers_groups_id='.$customers_groups_id;
}
$customers_language = '';
if ($customers_language != '') {
    $add_query_order .= '&customers_language='.$customers_language;
}

$url = $domain_url . '/api_customers.php?action=customers'.$add_query_order;

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_SSL_VERIFYPEER, false);

curl_setopt($ch, CURLOPT_HTTPHEADER, array(

    'Content-Type: application/json',
    "Cache-Control: no-cache",
    'Usuariol: ' . base64_encode($usuariol),
    'Senha1: ' . base64_encode($senha1))

);

$result = curl_exec($ch);
curl_close($ch);

print_r($result);

// sample customers list eof
```

Return:

Obs: Limit of 1000 customers per consult

customers\_id  
customers\_lastname  
customers\_firstname  
date\_account\_created  
referral  
customers\_status
